### Other Hazards

Percentage of mixture consists of ingredient(s) with unknown acute toxicity: 15%.

The product contains less than 0.1% w/w RCS (respirable crystalline silica) as determined by the SWERF method. The respirable crystalline silica content can be measured using the "Size - Weighted Respirable Fraction – SWERF" method. All details about the SWERF method is available at [www.crystallinesilica.eu](http://www.crystallinesilica.eu)

Depending on the handling and use (grinding, drying, bagging), airborne respirable dust may be generated. Dust contains respirable crystalline silica. Prolonged and or massive inhalation of respirable crystalline silica dust may cause lung fibrosis, commonly referred to as silicosis. Principal symptoms of silicosis are cough and breathlessness. Occupational exposure to respirable dust should be monitored and controlled. The product should be handled using methods and techniques that minimize or eliminate dust generation.

All ingredients are non-hazardous or below applicable cut-off levels.

## SECTION 4 - FIRST-AID MEASURES

### Description of first aid measures

Contaminated individuals of chemical exposure must be taken for medical attention if any adverse effect occurs. Rescuers should be taken for medical attention, if necessary. Take copy of label and SDS to health professional with contaminated individual.

**EYE CONTACT:** If product enters the eyes, open eyes while under gentle running water for at least 15 minutes. Seek medical attention if irritation persists.

**SKIN CONTACT:** Wash skin thoroughly after handling. Seek medical attention if irritation develops and persists. Remove contaminated clothing. Launder before re-use.

**INHALATION:** If exposed to excessive levels of dust or fumes, remove to fresh air and get medical attention. Get medical attention if cough and other symptoms develop. If you feel unwell, seek medical advice (show the label where possible).

**INGESTION:** If product is swallowed, call physician or poison control center for most current information. If professional advice is not available, do not induce vomiting. Never induce vomiting or give diluents (milk or water) to someone who is unconscious, having convulsions, or who cannot swallow. Seek medical advice. Take a copy of the label and/or SDS with the victim to the health professional.

### Most important symptoms and effects, both acute and delayed

Dust may cause mechanical eye irritation.

### Medical conditions aggravated by exposure:

This material or its emissions may aggravate pre-existing disorders involving any target organs mentioned in this Safety Data Sheet as being at risk.

### Indication of immediate medical attention and special treatment needed

Treat symptoms and reduce over-exposure.

## SECTION 5 - FIRE-FIGHTING MEASURES

### Extinguishing media

Water, Dry powder / dry sand, alcohol-resistant foam, dry chemical or CO<sub>2</sub>.

### Specific hazards arising from the chemical

### Special firefighting Procedure

Incipient fire responders should wear eye protection. Structural firefighters must wear Self-Contained Breathing Apparatus and full protective equipment. Isolate materials not yet involved in the fire and protect personnel. Move containers from fire area if this can be done without risk; otherwise, cool with carefully applied water spray. If possible, prevent runoff water from entering storm drains, bodies of water, or other environmentally sensitive areas.

## SECTION 6 - ACCIDENTAL RELEASE MEASURES

### Small Spill:

Sweep or vacuum material. Transfer to secondary container to be properly disposed.

# SAFETY DATA SHEET

**Large Spill:**

Ensure adequate ventilation.  
Avoid dust formation.  
Evacuate personnel to safe areas.  
Avoid contact with skin, eyes and clothing.  
Wear personal protective equipment.  
Avoid breathing dust.  
Use the indicated respiratory protection if the occupational exposure limit is exceeded and/or in case of product release (dust).  
Special sliding risk through leaking of spilled product in connection with water.  
Avoid dust formation; avoid dry sweeping  
Use vacuum suction unit, or shovel into bags.

**Environmental precautions**

Do not let product enter drains, do not allow to sewers/surface or ground water. See Section 12, Ecological information.

**Methods and material for containment and cleaning up**

Pick up released product with appropriate implements & return to original container if reusable, or dispose. Dispose of in accordance with applicable Federal, State, and local procedures (see Section 13, Disposal Considerations).

## SECTION 7 - HANDLING and STORAGE

**General Procedures:**

Wash hands before breaks and at the end of workday.

**Handling:**

Avoid dust formation. Provide sufficient air exchange and/or exhaust in work rooms. In case of insufficient ventilation, wear suitable respiratory equipment. For personal protection see section 8. Handle and open container with care.  
If you require advice on safe handling techniques or specific uses, please contact your supplier or check the further information referred to in section 16.

**Storage:**

Minimize airborne dust generation and prevent wind dispersal during loading and unloading. Keep containers closed and store packaged products so as to prevent accidental bursting. Activated carbon can lead to a reduction of oxygen in closed containers. Keep away from oxidizing agents. Keep away from metal salts.

**Specific end uses**

Adsorbent, filtration.
